IESM' 2009

International Conference on Industrial Engineering and Systems Management

May 13-15, 2009

Montréal, Canada

CALL FOR PAPERS

Aligned with the driving realities of the new economy, the goal of IESM'2009 is to bring researchers and professionals from all relevant disciplines (system theory and systems engineering, marketing and organizational behavior, logistics and operations management, quality assurance, information technology, etc) together to discuss issues and share their research and development results and experience. Authors are invited to submit their original work and propose sessions in this area:

- Industrial engineering and systems management
- Supply chain design and performance evaluation
- Production planning, scheduling, and control
- Logistics, transportation, and distribution systems
- Maintenance, reliability, and product life cycle management
- System design, capacity planning, and facility layout
- Quality management
- Project selection, planning, and scheduling
- Process modeling, evaluation, and control
- Customer service systems design and management
- Warehouse and inventory management
- Innovation management and entrepreneurship
- Information systems
- Data warehousing and data mining
- Decision analysis and decision support systems
- Artificial Intelligence and its applications

SUBMISSION OF PAPERS

Deadline for paper submission: **November 15, 2008**

Notification of paper acceptance/rejection: **February 15, 2009**

Deadline for final version: **March 1, 2009**

PUBLICATION POLICY

Authors are requested to provide a full paper of 10 pages maximum. Prior experience with IESM conferences shows that quality papers will be considered for publication in special issues of prestigious international journals.
